Product Catalog

Wood Types

Our urns are made out of genuine North American hardwoods. We use a clear wood finish, never stained, which highlights the natural wood beauty. Wood tones & grains vary making each urn as unique as your pet!

Cherry

Natural cherry comes in a variety of tones, anywhere from a light tan or caramel tone to pinkish tones. Over time as it is exposed to light, cherry develops a beautiful warm, reddish brown tone that lasers well.

Walnut

Walnut is our darkest wood. It can vary from a pale brown to a dark, chocolate color brown, usually with darker brown streaks in it. Some of the walnut may have a grey, purple, or reddish cast to it. Walnut also lasers well.

Oak

Oak tones can range from light to reddish gold. The grain of oak is typically straight with a coarse, uneven texture. Note: This particular wood grain can cause uneven engraving.

Maple

Ranges in color from a creamy white, yellow/tan, to a caramel tone. It is excellent for lasereng.

Rectangle Frame

Oval Frame

Personalization Options:

Can laser up to 4 corners
8 Characters per line
Up to 3 lines per corner

Date Format:
(If applicable)
